

MIHIR RATHOD

Ahmedabad, India | +91 9712212242 | mihir8716@gmail.com | LinkedIn | GitHub | Portfolio

Profile

M.Tech Cybersecurity student with hands-on experience in **Web Application Penetration Testing (VAPT)** through internships and practical security projects. Proficient in **OWASP Top 10** testing using **Burp Suite**, **Nmap**, **OWASP ZAP**, **SQLMap**, and **Kali Linux**. Built **VulnProbe**, **PhantomEye**, and **CipherGuard**. Seeking an entry-level **VAPT / Penetration Tester** role.

Skills

Web Application Security: VAPT, Web Application Penetration Testing, OWASP Top 10, API Security Testing, Authentication Testing, Authorization Testing, Vulnerability Assessment, CVSS Risk Scoring

Security Tools: Burp Suite, OWASP ZAP, Nmap, SQLMap, Metasploit, Nuclei, Gobuster, Subfinder, Wireshark, Kali Linux

Vulnerability Testing: SQL Injection (SQLi), Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), IDOR, Security Misconfiguration, Directory Enumeration, Port Scanning

Programming & Technologies: Python, JavaScript, HTML, CSS, Flask, MongoDB, REST APIs, Git, Linux

OSINT & Reconnaissance: WHOIS, DNS Enumeration, AbuseIPDB, VirusTotal, Email Reconnaissance, Username Enumeration

Internship Experience

Selkey Cyber Security

Jul 2026 – Present

VAPT Intern

- Performed **manual and automated web application penetration testing** on client applications following the **OWASP Top 10** methodology.
- Identified, validated, and documented vulnerabilities including **SQL Injection (SQLi)**, **Cross-Site Scripting (XSS)**, **IDOR**, **CSRF**, and **Security Misconfigurations** using manual testing and industry-standard security tools.
- Conducted **reconnaissance and attack surface analysis** using **Burp Suite**, **Nmap**, **Nuclei**, **Gobuster**, **Subfinder**, and **Kali Linux** to discover exposed assets and potential security weaknesses.
- Prepared detailed **VAPT reports** including Proof of Concept (PoC), **CVSS v3.1** severity ratings, business impact assessment, and remediation recommendations for clients.
- Collaborated with senior security consultants to reproduce reported vulnerabilities, verify remediation, and support secure application deployment.

ShadowFox

Dec 2025 – Jan 2026

Cybersecurity Intern

- Performed web application vulnerability assessments using **Burp Suite**, **SQLMap**, and **Nmap**, identifying vulnerabilities including **SQLi**, **XSS**, and **CSRF** following the **OWASP Top 10**.
- Conducted network reconnaissance and traffic analysis using **Nmap** and **Wireshark** to identify exposed services and potential security risks.
- Documented findings with **CVSS** severity ratings and remediation recommendations.

SoftEdge Infotech

Jan 2024 – Jun 2024

Frontend Developer Intern

- Developed responsive web applications using **React.js**, integrated REST APIs, and gained a strong

understanding of web application architecture, HTTP requests, authentication flows, and client-side security concepts.

Projects

VulnProbe — Web Vulnerability Scanner

Live Project | Source Code

- Developed a **Flask-based Web Application Vulnerability Assessment** platform for automated security testing.
- Implemented **8 security modules** including **SQL Injection (SQLi)**, **Cross-Site Scripting (XSS)**, **CSRF**, **Directory Enumeration**, **Port Scanning**, and **CVE-based Vulnerability Detection**.
- Generated automated **HTML and PDF vulnerability reports** with detailed findings, severity ratings, and remediation recommendations.
- Designed an intuitive dashboard to simplify vulnerability assessment and security report visualization.

PhantomEye — OSINT Intelligence Platform

Live Project | Source Code

- Built an **OSINT and reconnaissance platform** featuring **12 integrated modules**.
- Implemented **WHOIS Lookup**, **DNS Lookup**, **Email Intelligence**, **Username Enumeration**, **IP Reputation Analysis**, and **Bulk IP Scanning**.
- Integrated multiple threat intelligence sources to automate reconnaissance and information gathering.
- Designed a user-friendly web interface for performing OSINT investigations efficiently.

CipherGuard — Password Security Analyzer

Live Project | Source Code

- Developed a **Password Security Analyzer** to evaluate password strength using **entropy analysis**.
- Implemented **crack-time estimation**, secure password generation, and password complexity analysis.
- Integrated the **HaveIBeenPwned API** to detect compromised passwords through real-time breach checking.
- Provided actionable security recommendations to help users create stronger and more secure passwords.

Education

Indus University, Ahmedabad	<i>2025 – Present</i>
M.Tech in Cybersecurity (Pursuing)	
Indus University, Ahmedabad	<i>2020 – 2024</i>
B.Tech in Information Technology	

Certifications

- Cybersecurity Job Simulation — Deloitte (Forage)
- Cybersecurity Fundamentals — IBM
- Introduction to Cybersecurity — Cisco Networking Academy
- Certified Cybersecurity Educator Professional (CCEP)

Additional Information

Languages: English, Hindi, Gujarati
Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration
Interests: Web Application Security, Bug Hunting, Threat Research, OSINT
