

# MIHIR RATHOD

Ahmedabad, India | +91 9712212242 | mihir8716@gmail.com | LinkedIn | GitHub | Portfolio

## Profile

---

M.Tech Cybersecurity student with hands-on experience in **Web Application Penetration Testing (VAPT)** through internships and practical security projects. Proficient in **OWASP Top 10** testing using **Burp Suite**, **Nmap**, **OWASP ZAP**, **SQLMap**, and **Kali Linux**. Built **ApiShield**, **VulnProbe**, **PhantomEye**, and **CipherGuard**. Seeking an entry-level **VAPT / Penetration Tester** role.

## Skills

---

**Web Application Security:** VAPT, Web Application Penetration Testing, OWASP Top 10, API Security Testing, Authentication Testing, Authorization Testing, Vulnerability Assessment, CVSS Risk Scoring

**Security Tools:** Burp Suite, OWASP ZAP, Nmap, SQLMap, Metasploit, Nuclei, Gobuster, Subfinder, Wireshark, Kali Linux

**Vulnerability Testing:** SQL Injection (SQLi), Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), IDOR, Security Misconfiguration, Directory Enumeration, Port Scanning

**Programming & Technologies:** Python, JavaScript, HTML, CSS, Flask, MongoDB, REST APIs, Git, Linux

**OSINT & Reconnaissance:** WHOIS, DNS Enumeration, AbuseIPDB, VirusTotal, Email Reconnaissance, Username Enumeration

## Internship Experience

---

### Selkey Cyber Security

*Jul 2026 – Present*

*VAPT Intern*

- Performed **manual and automated web application penetration testing** on client applications following the **OWASP Top 10** methodology.
- Identified, validated, and documented vulnerabilities including **SQL Injection (SQLi)**, **Cross-Site Scripting (XSS)**, **IDOR**, **CSRF**, and **Security Misconfigurations** using manual testing and industry-standard security tools.
- Conducted **reconnaissance and attack surface analysis** using **Burp Suite**, **Nmap**, **Nuclei**, **Gobuster**, **Subfinder**, and **Kali Linux** to discover exposed assets and potential security weaknesses.
- Prepared detailed **VAPT reports** including Proof of Concept (PoC), **CVSS v3.1** severity ratings, business impact assessment, and remediation recommendations for clients.
- Collaborated with senior security consultants to reproduce reported vulnerabilities, verify remediation, and support secure application deployment.

### ShadowFox

*Dec 2025 – Jan 2026*

*Cybersecurity Intern*

- Performed web application vulnerability assessments using **Burp Suite**, **SQLMap**, and **Nmap**, identifying **SQLi**, **XSS**, and **CSRF** issues aligned with the **OWASP Top 10**.
- Conducted network reconnaissance and traffic analysis using **Nmap** and **Wireshark** to identify exposed services and potential risks.
- Documented findings with **CVSS** severity ratings and remediation recommendations.

### SoftEdge Infotech

*Jan 2024 – Jun 2024*

*Frontend Developer Intern*

- Worked on **multiple client projects** at a web services company, developing responsive web applications using **React.js** and **Tailwind CSS**.
- Integrated **REST APIs** into client-facing interfaces, handling API requests and responses, **authentication flows**, and dynamic data rendering.
- Gained a strong understanding of web application architecture, **HTTP requests**, and **client-side security** concepts, which now supports my security testing work.

## Projects

---

ApiShield — API Security & VAPT Scanning Platform

Live Project | Source Code

- Built a full-stack **API security testing platform** using **FastAPI + React** that automates **OWASP API Top 10** checks including security headers, HTTPS enforcement, and rate limiting.
- Designed a **dual-identity BOLA/IDOR testing engine** that authenticates as two separate users to detect broken object-level authorization on live API endpoints.
- Implemented **JWT-based authentication, OpenAPI specification import, endpoint auto-discovery, and Fernet-encrypted credential storage** for Bearer, Basic, and API-Key authentication.
- Generated **severity-classified vulnerability reports** and deployed the platform using **Render** with **Neon PostgreSQL**.

VulnProbe — Web Vulnerability Scanner

Live Project | Source Code

- Built a Flask-based automated **web vulnerability scanner** covering 8 security modules including **Port Scanning, Security headers, SQL Injection, XSS, Directory Enumeration, Sub domain, and CVE-based Vulnerability Detection**.
- Engineered automated **HTML/PDF report generation** with severity ratings and remediation guidance for every identified vulnerability.
- Designed a centralized dashboard for **real-time scan visualization** and simplified vulnerability triage.

PhantomEye — OSINT Intelligence Platform

Live Project | Source Code

- Developed an **OSINT reconnaissance platform** with 12 integrated modules for automated information gathering.
- Built **WHOIS/DNS Lookup, Email Intelligence, Username Enumeration, IP Reputation Analysis, and Bulk IP Scanning** capabilities.
- Integrated multiple threat-intelligence sources including **VirusTotal** and **AbuseIPDB** to automate correlation of reconnaissance data.
- Designed a streamlined web interface enabling efficient **OSINT investigations** for security research.

CipherGuard — Password Security Analyzer

Live Project | Source Code

- Built a **password security analyzer** using entropy-based strength evaluation and brute-force crack-time estimation.
- Implemented secure password generation and multi-factor complexity analysis across **length, character sets, and patterns**.
- Integrated the **HaveIBeenPwned API** for real-time breach detection, flagging compromised credentials instantly.
- Delivered actionable, user-specific recommendations to strengthen **password security**.

## Education

---

|                                    |                |
|------------------------------------|----------------|
| Indus University, Ahmedabad        | 2025 – Present |
| M.Tech in Cybersecurity (Pursuing) |                |
| Indus University, Ahmedabad        | 2020 – 2024    |
| B.Tech in Information Technology   |                |

## Certifications

---

- Cybersecurity Job Simulation — Deloitte (Forage)
- Cybersecurity Fundamentals — IBM
- Introduction to Cybersecurity — Cisco Networking Academy
- Certified Cybersecurity Educator Professional (CCEP)

## Additional Information

---

**Soft Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration

**Interests:** Web Application Security, Bug Hunting, Threat Research, OSINT

**Languages:** English, Hindi, Gujarati
